

Filter Long Versions Of Viceroy & Kool Go National

After popular acceptance in select regional areas, Filter Longs versions of Viceroy and Kool cigarettes are being marketed nationally by Brown & Williamson Tobacco Corp.

To support these entries into the 100mm segment of the American market, B&W will begin an extensive multi-media advertising campaign.

The schedule includes network television with 60-second color commercials in dramatic, news, and variety shows each night of the week; special spot television commercials and multi-color newspaper advertisements in major markets; and full-page 4-color advertisements in national magazines.

Package designs of Viceroy Longs and Kool Filter Longs retain the basic form and colors of the two world-famous brands.

corporate the "feel" of the movie spectacular.

Counter displays, window displays and local advertising for the Gold Label product will carry out the basic story theme that United Artists will feature in their media and displays.

Arrangements have been made in five major cities to schedule special previews of "The Charge of the Light Brigade" for Gold Label distributors and key retailers. Consumer contests will feature free tickets to the show as well as copies of the stereophonic original score albums.

Gold Label customers will see one of the year's most exciting motion pictures, featuring David Hemmings, Vanessa Redgrave, Trevor Howard, John Gielgud, Harry Andrews and Jill Bennett. Of course, cigars are smoked "on screen"!

This entire marketing program, coordinated by Leonard F. Fellman, Sales Promotion Consultant, marks an important first in cigar industry merchandising, in which a fine cigar will have gained its "front mark" from an outstanding film.
